**Subject:** **Objection to proposed Fire station in North Goleta**

As a Goleta homeowner, I strongly object to the construction of yet another unnecessary building in the Goleta Ellwood area.

I fail to see why the Storke road fire station cannot cover the Goleta North jurisdiction. To cut down more beautiful eucalyptus trees and bulldoze more open space is, i feel, not what Goleta needs right now.

Goleta needs to put on the brakes vis a vis any further development, and address the traffic and crime concerns that have arisen since 2011-2012 and the over-building of our once lovely town. I feel there still is hope for Goleta if the city council will turn down projects like this fire station, along with the destruction of open space it's approval would involve.

I would appreciate a response from each council member as to how they plan to vote.

Thank you,

Mary Scott, Owner

Subject: New fire station

Dear Sir or Madam,

I would like to write in favor of the new fire station proposed next to the Winchester Canyon on ramp. Our community has continued to grow in that direction and needs another fire station to support the residents of that area.

I agree with the City of Goleta plan, please build the station to protect our community.

sincerely,

Lee Ann Palmer

**Subject:** Public Comment - Fire Station

Mayor Perotte and Council Members,

COAST supports the development of a new fire station in this neighborhood, but requests that this be used as an opportunity to strengthen active transportation and public transit networks. This could be a great opportunity to close bicycle network gaps on Hollister in the station vicinity and create a project consistent with the recently adopted Bicycle and Pedestrian Master Plan. As shown in the picture below, the existing class II bicycle lane abruptly ends on the north side of Hollister at the end of The Hideaway housing development to continue again at the right-hand turn lane for Cathedral Oaks.

Additionally, this would be a prime opportunity to create a developed bus shelter for SBMTD bus stop 960. Current conditions leave bus riders standing in the shoulder of the road without anywhere to sit. The bus stop does not seem to be reflected in the proposed plans.

We appreciate the City of Goleta's continued commitment to active transportation and hope this can be reflected in this project.

Thank You,

Joanna Kaufman
