Subject: Magnet permit tracking system and public portal

Madame Mayor, Councilmembers and Staff, Wow! Congratulations on the completion of this multiyear and very important project for the city and the community. Kudos to the consultants too for all their considerable efforts. It is quite an achievement!

I tried the system this morning and found all the permits I obtained thru the City, even the most recent one in Feb 2021 for my electrical panel upgrade.

I had hoped that permits obtained from the county would be included, but I could only find one from 2001(just after I bought the house). But Maybe no permitted work was done before that. But no matter, quite an undertaking to implement this system, surely a huge advancement from all the million plus paper records and microfiche files into the digital world!

I have only one question and that pertains to the security of the system from hackers and disruptive activities that might render the system unworkable or affect data.

Thank you, Cecilia Brown
